

## Declaration of honor and commitment

**for doctors, veterinarians, physiotherapists, trainers, specialist staff and caregivers**

The dignity and health integrity of every athlete is the foundation for a fair sporting competition. Any manipulation, especially by doping, violates this dignity and thus the ethical foundations of sport. The fight against doping is therefore of paramount importance for the credibility of sport.

Before FICEP, I therefore declare that:

1. Doping is not only a health risk for the athletes concerned, but a clear violation of the spirit of sport and of the principle of fairness.
2. I have never passed on, made available, prescription or applied substances to athletes or used methods that violate the applicable national or international anti-doping regulations.
3. I will continue to protect the dignity of every athlete and will not participate in any way in doping. I recognize the relevant anti-doping regulations, in particular the WADA Code, the NADA Code and the FICEP Anti-Doping Code. I know that trafficking, placing on the market and possessing no small quantities of doping substances is a criminal offence.
4. I acknowledge that a breach of anti-doping rules can have far-reaching consequences.

I know that a breach of this declaration could trigger further sanctions by sports federations or my employer.
